Transforming Lives with MERT/TMS:

A New Dawn in Autism Care Treating the Source, Not Just Symptoms

What is MERT/TMS?

MERT/TMS (Personalized repetitive Transcranial Magnetic Stimulation) marks the dawn of innovative mental health care, offering a non-invasive, drug-free approach tailored specifically for individuals with Autism Spectrum Disorder (ASD). By mapping your unique brainwave patterns, MERT/TMS delivers personalized treatment, setting a new standard in mental health care.

Key Benefits:

- **Meltdown Reduction:** Significant behavioral improvement, with less if any intense episodes.
- **Social Boost:** Enhanced interactions and eye contact.
- **Communication Leap:** Can show advances in verbal and non-verbal skills.
- **Behavioral Improvement:** Noticeable reduced toe walking and behavioral patterns.
- **Better Sleep:** Significant improvement in sleep patterns among individuals with sleep disruptions.

Treatment FAQ

- **Comfort and Ease:**

MERT/TMS treatment is gentle, with minimal to no discomfort, allowing patients a stress-free experience.

- **Impact on Concentration**

Patients with attention-related issues, including those with ADHD, report improved focus and concentration levels, aiding in better performance in academic and professional settings.

- **Speed of Results:**

Positive changes are often observed within the initial weeks of treatment, marking a quick turnaround for many patients.

Schedule an appointment

- Monday to Thursday: 8:00 AM - 8:00 PM
- Friday: 8:00 AM - 5:00 PM
- Saturday: Limited Availability

Your Child's Journey with Us

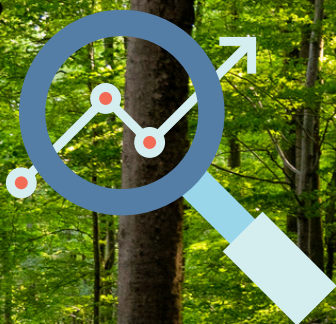

Data Gathering:

- Utilizing EEG for MERT, we map your brain's activity, ensuring a comfortable and precise process.

Analysis:

- Our experts analyze your brainwave data to create a treatment plan uniquely tailored to your brain's specific needs.

Treatment Delivery:

- A non-invasive 30 min session with our Technician. No Recovery time .. No notable side-effects, extremely low risk.

Ongoing Progress Monitoring

- Regular assessments to track improvements and adjust treatment as needed.

MeRT vs. TMS Therapy

- While both methods can be effective depending on personal situations, TMS therapy delivers the same treatment to every patient, regardless of the degree of brainwave frequency disturbance. MeRT, on the other hand, offers a personalized approach based on your unique brain activity.

Who We Are

Complete Mind Care of PA (CMC) provides personalized mental health care with over 30 specialists offering innovative, non-invasive treatments like TMS for depression, Autism, Addiction, ADHD, OCD, and PTSD. Dedicated to patient-centered approaches, we use FDA-approved methods, supported by insurance, to help individuals and families achieve mental health remission and enhance well-being.
